

Voipfone Wins Communication Provider of the Year Award 2013

Voipfone (www.voipfone.co.uk) has won the 2013 Federation of Communication Services, Communication Provider of the Year Award.

(PRWEB UK) 3 July 2013 -- [Voipfone](http://www.voipfone.co.uk) were presented the award at the Institute of Engineering and Technology, an iconic building, next to the Savoy Hotel on London's Thames Embankment.

Receiving the award, Colin Duffy, Voipfone's CEO said:

“The FCS has over 300 members with many well-known brands amongst them, so beating the best of the best in the industry is something to be very proud of. [Voipfone](http://www.voipfone.co.uk) has won several awards this year, including the Queen's Award for Enterprise; this latest award from the FCS is adding to what has already been a great year.”

Chris Pateman, FCS CEO said, “These awards have a unique place in the industry's calendar, recognizing as they do innovation and professionalism right across the converged communications industry.”

“Each of the awards was judged by a panel of industry players and representatives from the regulator or academia. Many congratulations to all the award winners and runners up who in their diverse ways have demonstrated innovation and customer service in the competitive world of UK communications services.”

About Voipfone

Voipfone is an internet telephone service provided by iNet Telecoms Ltd, a London-based company which was formed to develop the latest voice over internet technologies. It offers web-based, self-service and low cost, high quality services that have more advanced features than the old public switched telephone network (PSTN).
